

Fast Facts

HOMOSEXUALITY

*Do you not know that the unrighteous will not inherit the kingdom of God? Do not be deceived. **Neither fornicators, nor idolaters, nor adulterers, nor homosexuals, nor sodomites, nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners will inherit the kingdom of God. And such were some of you. But you were washed, but you were sanctified, but you were justified in the name of the Lord Jesus and by the Spirit of our God.***

– 1 Corinthians 6:9-11, NKJV

The Staggering Truth: Monogamy Not Even a Consideration

- *The Advocate*, a leading periodical in the gay community, released the results of a survey taken in August 1994, showing that **57% of gay men have had sex with more than thirty partners**. This survey also revealed that **48% of homosexuals had participated in a “three-way” during the previous 5-year period**. (Source: “The Advocate Sex Poll,” *The Advocate*, August 1994.)
- The June 2003 issue of the *American Journal of Public Health* shared a survey of sexually active homosexual men. The results revealed that the study’s participants averaged seven sex partners in just the previous six months, while **25% of respondents claimed to have had sex with 18 or more partners during the previous six months**. (Source: “Sexual Suicide: The Rebellion of Homosexuality Causes Untold Suffering,” *Agape Press*, September 29, 2003.)
- One study, released at the 2003 National HIV Prevention Conference in July, found that **39% of “gay” and bisexual men admitted that they had met partners over the Internet and engaged in unprotected sex**, according to *USA Today*. (Source: “Sexual Suicide: The Rebellion of Homosexuality Causes Untold Suffering,” *Agape Press*, September 29, 2003.)
- A survey conducted by *Genre*, a periodical popular in homosexual circles, found that **24% of respondents claimed to have had more than 100 sexual partners** during their lifetimes. (Source: “Survey Finds 40 Percent of Gay Men Have Had More Than Forty Sexual Partners,” *Lambda Report*, January 1998.)

An Agenda Revealed:

In **1972**, the National Coalition of Gay Organizations met in Chicago to develop an initial gay-rights platform, which included:

- “Federal encouragement and support for sex education courses, prepared and taught by qualified gay women and men ... presenting homosexuality as a viable alternative to heterosexuality;
- “Repeal of **all state laws prohibiting private sexual acts** involving consenting adults;
- “Repeal of all state laws prohibiting solicitation for private sexual liaisons; and laws prohibiting prostitution, both male and female;
- “Enactment of legislation so that child custody... shall not be denied because of sexual orientation;
- “Repeal of all laws prohibiting transvestitism and cross-dressing;
- “Repeal of **all laws governing the age of sexual consent** (legalize pedophilia);
- “Repeal of all legislative provisions that restrict the sex or number of persons entering into a marriage unit, and the extension of legal benefit... regardless of sex or numbers.”

In January **2005**, twenty-two homosexual organizations met in Washington, D.C., to determine a plan of attack for their future. They agreed upon an eight-point proclamation:

- “We must fight for equal employment opportunity, benefits and protection;
- “We must fight against anti-LGBT violence and for the **inclusion of sexual orientation and gender identity in federal hate crimes laws**;
- “We must fight — in both the private and public sectors — for better access to health care and insurance, including age-appropriate, LGBT-inclusive comprehensive sexuality education;
- “We must insist on safe schools, free from bullying, harassment, and discrimination;
- “We must fight for family laws that give our children strong legal ties to their parents;
- “We must work to overturn the military’s discriminatory anti-LGBT ban;
- “We must continue to expose the **radical right’s** efforts to **advance a culture of prejudice and intolerance**, and we must fight their attempts to enshrine **anti-gay bigotry** in our state and federal laws and constitutions;
- “And we must continue our vigorous fight for the **freedom to marry** and the equal protections, rights and responsibilities that safeguard our families, strengthen our commitments, and continue to transform understanding of our lives.”

Employing Deception

In the early stages of any campaign to reach straight America, the masses should not be shocked and repelled by premature exposure to homosexual behavior itself. Instead, the imagery of sex should be downplayed and gay rights should be reduced to an abstract social question as much as possible. First let the camel get his nose inside the tent—only later his unsightly derriere!

– Marshall Kirk and Erastes Pill, “The Overhauling of Straight America,” *Guide Magazine*, 1987.

Homosexuality, Mental Illness, and the American Psychiatric Association

In 1973, the APA removed homosexuality from its diagnostic category of mental illnesses. This action came not as a result of new research and findings, but was ultimately brought about by a militant protest staged by activists at the APA’s annual convention. In other words, intimidation was a key motivation. In fact, only 16% of the entire APA membership actually voted in favor of the radical change.

— Dr. James Mallory, Head of Psychiatric unit – Rapha Center, Atlanta, Ga., *Homosexuality*; Ronald Bayer, *Homosexuality and American Psychiatry: The Politics of Diagnosis* (NY: Basic Books, 1981), 101-54; William Dannemeyer, *Shadow in the Land* (San Francisco: Ignatius Press, 1989), pp. 24-39.

Homosexuality Is Not a Civil Right!

The assertion that homosexuals are a minority group under current civil rights law is false. Minority status has been determined by the U.S. Supreme Court based on three criteria:

1. Economic Deprivation — No! Those engaged in the homosexual lifestyle are among the most advantaged people in the U.S. On average, they have a higher per capita income than heterosexuals and higher household incomes.

— *Wall Street Journal*, February 10, 1989,
and *New York Times*, August 22, 1990.

2. Political Powerlessness — No! Homosexuals demonstrate great influential political power far beyond their actual numbers. The Human Rights Campaign Fund has annually donated millions of dollars to candidates, more than most other noncorporate PACs (*The Economist*, April 24, 1993). Media news and entertainment coverage is overwhelmingly favorable.

3. Immutable Characteristics — No! Minority groups share unchangeable, benign, non-behavioral traits such as race, ethnicity, disability, or national origin. Homosexuals are the only group to claim minority status based on behavior!

The Target: Your Children

The homosexual agenda is infiltrating schools — once thought to be places free of such perversity. The Gay, Lesbian, Straight Education Network (GLSEN) hosts numerous conferences for school teachers and students around the nation each year and has launched thousands of Gay/Straight Alliances in schools across America. The organization uses workshops to advance its radical agenda, some of which have been entitled:

- “Ask the Transsexuals”
- “Early Childhood Educators: How to Decide Whether to Come Out or Not”
- “Lesbian Avengers: How to Promote Queer Friendly Activism in Your Schools and in Your Lives”
- “Diesel Dykes and Lipstick Lesbians: Defining and Identifying Butch/Femme Identity”
- “The Religious Wrong: Dealing Effectively with Opposition in Your Community”
- “Starting a Gay/Straight Alliance in Your School”

— Source: “Public Employees Teach Kids ‘Gay’ Sex,”
World Net Daily, May 9, 2000.

Other recent examples of the homosexual agenda in schools include: The Ashland-Boyd County School District in Kentucky has made anti-harassment workshops mandatory for all students and teachers as part of an agreement struck with the ACLU, which also allowed Gay/Straight Alliance student groups to meet in school buildings.

A transgender advocacy group called Transgender Day of Remembrance has made inroads into America’s public school system to “educate” children about violence against transgender people.

A Deadly Lifestyle Choice

The number of new AIDS and HIV infections has risen among homosexual and bisexual men in the United States. In a report issued in concert with World AIDS Day, the Centers for Disease Control and Prevention (CDC) announced that **new HIV and AIDS diagnoses in 32 states rose 11 percent between 2000 and 2003 among homosexual and bisexual males.**

At the same time, rates of new infection remained the same among other population cohorts. Overall, the infection rate rose to 19.7 cases per 100,000 people, up from 19.5 in 2000.

Public health experts in the U.S. have been warning of a potential resurgence in the AIDS epidemic, which was eased by the development of drugs in the early 1990s. **According to the CDC report, the disease is showing signs of a comeback, especially among homosexual males.**

— Source: “HIV, AIDS Cases Rise Among U.S. Gay, Bisexual Men,”
Reuters News, December 1, 2004.

According to the *Journal of Clinical Pathology*, **homosexuals are 3.7 times more likely to be infected with gonorrhea** than are heterosexuals. According to their findings, **15.2% of homosexuals suffer from pharyngeal (throat) gonorrhea.**

— Source: “Value of Screening for Oropharyngeal Chlamydia Trachomatis Infection,” *Journal of Clinical Pathology*, 1995, p. 658.

According to Dr. Andrew Grulich at the National Institutes of Health, 90 percent of HIV positive gay men are infected with the Human Papillomavirus (HPV or genital warts), and 65% of HIV negative gay men are infected with HPV, an incurable sexually transmitted disease.

Cancer News, August 17, 2000.

There is Hope for Change

How do we know? Research increasingly says so!

“My literature review contradicts the policies of major mental health organizations because it suggests that sexual orientation, once thought to be an unchanging sexual trait, is actually quite flexible for many people, changing as a result of therapy for some, ministry for others and spontaneously for still others.”

— Source: Dr. Warren Throckmorton, “Initial Empirical and Clinical Findings Concerning the Change Process for Ex-Gays,” *Professional Psychology: Research and Practice*, June 2002.

“. . . all the existing evidence suggests strongly that homosexuality is quite changeable.”

— Source: Dr. Jeffrey Satinover, former Fellow of Psychiatry & Child Psychiatry at Yale University, *Homosexuality and the Politics of Truth*, 1996.
